

CABINET MUST ACT TO STOP THE GENOCIDE!

Why do we stand here now?

We are in front of the Treasury Building. Prime Minister Navin Ramgoolam's office is inside. His Cabinet meets here on Fridays at this time.

We are here now to call on the Cabinet to act, in the name of humanity, to act against ISRAELI-US starvation policy now. All Governments are acting. But not our government. Ours *weakens* the Mauritian stand. VPM Paul Béranger uses lame excuses, Mauritius is “small” and “fragile”, he snivels. Truth is Palestine is “small” and “fragile”, unable to protect Palestinians from invaders and bombardiers, or from the tight noose of starvation the US-Israel inflict upon it. Yet, Palestinians are bravely defending their land from illegal occupiers.

Can the Government not act? Has the Cabinet got no back-bone?

It is so easy:

- Halt visas for Israelis TODAY! Unless with affidavits of no links ever to military.
- Suspend diplomatic relations today! As Ramgoolam's Government did in 2009.
- Halt, cancel and ban all and any contracts with any Israeli firms, public or private.
- Announce call for UN suspension of Israeli UN membership at General Assembly.
- Call for enforcement of the ICJ judgment to free Gaza, the West Bank including East Jerusalem from Israeli occupation, colonization and apartheid. The General Assembly resolution's September dead-line is upon us now.
- Call publicly for a total arms embargo on Israel.
- Today, pass a regulation to ban cultural, sports and academic contact with Israel, except in cases where those concerned publicly denounce the Israeli genocide.
- Call TODAY for all crossings to be opened into Gaza for UNRWA to distribute aid.
- Call TODAY for a Gaza no-fly zone enforced by the UN Security Council countries.

Israel and the USA are now intentionally starving the Palestinians in Gaza to death. The moment is grave. Israel and the USA offer food in “traps” in the South, and shoot starving people in the traps. With what aim? With the perfidious aim of “herding” them further to the Southern tip of Gaza, so as to expel them out of their land. They do this, even though Israel's 75 year occupation of Palestine was declared illegal by the ICJ last year. At the ICJ the Mauritian State contributed to this huge victory. And now the Government capitulates?

World-Wide

Every state in the world scrambles to take distance from Israel, to condemn it. European countries do too little too late, but they harden their position. What does the Ramgoolam-Béranger-Duval-Subron government do? It weakens Mauritius' stand in its recent abject Communiqué. In treachery, it withdraws Mauritius' ICJ oral submissions against Israel's for starvation policy. It does all this, while the Israeli military assassinates doctors, nurses, and journalists. It does all this, as Gaza is reduced to rubble, poisoned rubble. For Trump to build a real estate IRS?

Our Government, by lashing Mauritius to USA-Israel puts the people of Mauritius in danger. Housing a military base on Diego Garcia is not only morally abject, but also a danger to the people. Could Ramgoolam tonight on TV tell us what the US is building at Bagatelle?
